BECOMES

MANITOU GROUP ATTACHMENTS

Effective in 2021, Manitou Group, known for engineering iconic machines under the Manitou, GEHL, and Mustang by Manitou brands, announces the launch of Manitou Group Attachments. The EDGE brand will be transitioned to its new name Manitou Group Attachments to globalize the brand in all aspects including decals, website, marketing materials and price books.

“In an effort to better align our global attachment range EDGE attachments in North America will transition in 2021 to Manitou Group Attachments. Providing innovative designs and engineered solutions to our customer needs has been a cornerstone of Edge attachments since 2001. Expanding on our global engineering and design capabilities will allow us to continue building on that trust and optimize performance, attachment by attachment, across our machine range.”

Auger Bits • Tree and Shrub

Tree and Shrub auger bits are approximately 50" in overall length, 5/16" double wrapped flighting and designed with smaller diameter auger flighting at the bottom, which leaves a space for root balls, fertilizer, or mulch. Heat treated teeth and "fishtail" center point.

2-9/16" Round		Model	No. of Teeth	Tooth Style	Wt. (lbs)	Retail Price

Auger Bits • Rock, Standard

Rock auger bits feature a reinforced fabricated boring head, double wrapped 5/16" fighting, conical carbide teeth and a standard "fishtail" center point. These bits are not intended for use in concrete or asphalt applications.

2-9/16" Round

511142	DFB and SQ Toothplate Repair Kit (36" Auger), teeth sold separately	10.0	\$122.40

Breakers • 150 ft/lb

Break concrete quickly and easily into load-ready debris. Only two moving parts provide enough power to break through the toughest materials. Breaking force is generated by the hydraulic flow and pressure of the compact excavator and a nitrogen charged backhead increases the impact energy maximizing hammer production. The advanced hydraulic circuit provides increased flow to the valve and piston, resulting in faster cycle times, increased tool penetration and more productivity per hour. There are no Through-bolts to constantly torque or replace, and the front wear bushing is easily replaced so your hammer is always in perfect working condition. Manitou Americas, Inc. has models available from the 150 ft/lb impact energy class to 1,500 ft/lb impact energy class. Mounting brackets are available for most compact excavators, and breakers come with amoil point tool. Hoses not included. **When ordering breakers for excavators equipped with quick attach, customer must specify type of quick attach.**

150 ft/lb Breakers		Model	Hyd. Req. (gpm/lpm)	Impact Energy Class (lb-ft/J)	Cycles/Blows per Minute	Wt. (lbs)	Retail Price
Gehl/Mustang							
50504116	EBX150 Breaker for Gehl Z17 & Mustang 170Z pin on only	EBX150	3-6/12-23	150/203	600-1500	140.0	\$4,298.00

503003	Chisel Bit for EBX275, EB25 Breaker				11.0	\$204.00

Breakers • 375 ft/lb

Break concrete quickly and easily into load-ready debris. Only two moving parts provide enough power to break through the toughest materials. Breaking force is generated by the hydraulic flow and pressure of the compact excavator and a nitrogen charged backhead increases the impact energy maximizing hammer production. The advanced hydraulic circuit provides increased flow to the valve and piston, resulting in faster cycle times, increased tool penetration and more productivity per hour. There are no Through-bolts to constantly torque or replace, and the front wear bushing is easily replaced so your hammer is always in perfect working condition. Manitou Americas, Inc. has models available from the 150 ft/lb impact energy class to 1,500 ft/lb impact energy class. Mounting brackets are available for most compact excavators, and breakers come with amoil point tool. Hoses not included. **When ordering breakers for excavators equipped with quick attach, customer must specify type of quick attach.**

375 ft/lb Breakers						
	Model	Hyd. Req. (gpm/lpm)	Impact Energy Class (lb-ft/J)	Cycles/Blows per Minute	Wt. (lbs)	Retail Price
Gehl/Mustang						
50503831	EBX375 Breaker Standard (5.10" C to C) for Gehl 143, 153, 193, 223, 253 and Mustang 1403, 1503, 1903, 2203, 2503 with or without quick attach	EBX375	6-11/23-42	375/508	600-1300	\$6,298.00

Breakers • 1000 ft/lb

Break concrete quickly and easily into load-ready debris. Only two moving parts provide enough power to break through the toughest materials. Breaking force is generated by the hydraulic flow and pressure of the compact excavator and a nitrogen charged backhead increases the impact energy maximizing hammer production. The advanced hydraulic circuit provides increased flow to the valve and piston, resulting in faster cycle times, increased tool penetration and more productivity per hour. There are no Through-bolts to constantly torque or replace, and the front wear bushing is easily replaced so your hammer is always in perfect working condition. Manitou Americas, Inc. has models available from the 150 ft/lb impact energy class to 1,500 ft/lb impact energy class. Mounting brackets are available for most compact excavators, and breakers come with a moil point tool. **Hoses not included. When ordering breakers for excavators equipped with quick attach, customer must specify type of quick attach.**

1000 ft/lb Breakers		Model	Hyd. Req. (gpm/lpm)	Impact Energy Class (lb-ft/J)	Cycles/Blows per Minute	Wt. (lbs)	Retail Price

Buckets • Ditching

These buckets are specifically designed for ditch construction and maintenance - they are also useful in light digging, grading and slope work. These buckets feature a straight cutting edge (no teeth) for smooth grading, and accepts a replaceable bolt on cutting edge to save wear on the bucket edge. Available in various sizes from 24 inch to 72 inch widths to fit many brands and sizes of compact excavators.

Ditching		Wt. (lbs)	Retail Price
Bobcat

Buckets • Bolt-On Cutting Edges

Bolt-on cutting edges extend the life of a bucket by adding a wear edge to the front of the bucket. Bolt-on edges have a double bevel so they are reversible—extending the life of the edge itself. Various thickness and width options are available to fit your bucket exactly. **CTC = bolt hole center to center distance. H = number of holes drilled in cutting edge.**

Buckets • Tilting

Tilting buckets enhance a machine's grading capability in ditch cleaning and/or sloping applications. Capable of tilting 45 degrees in either direction to increase productivity - eliminates the need for a separate tilting attachment. Hoses and couplers not included.

Tilting		Wt. (lbs)	Retail Price
Case

Compaction Plates • EC35 Compaction Plates

The EC35 Compaction Plate is specifically designed for use in narrow trenches with a footprint of 12 inches and often eliminates the extra cost of a man and walk-behind unit and the added expense of trench boxes or shoring. Compaction Plates are also ideal for driving steel sheeting used for retaining walls.

Compaction Plates • EC75 Compaction Plates

Compaction plates can safely compact trenches, often eliminating the extra cost involved with a man and walk-behind unit and the added expense of trench boxes or shoring. Compaction Plates are also ideal for driving steel sheeting used for retaining walls.

Compaction Plates • Mount Kits

The Compaction Plates feature special rubber shock absorbers to protect the boom by isolating it from vibrations. Use it anywhere a boom can reach in trenches, around foundations, on slopes or seawalls, set posts or drive steel sheeting for retaining walls. Built for rugged, reliable performance with hardened steel components to resist the effects of stress, vibration, fatigue and impact forces.

Frost Ripper

Frost Rippers are specifically designed to pre-rip frozen ground and tough soil that exceeds a buckets recommended tolerance. It is also an excellent tool option to remove stumps, roots and re-bar. The 24" ripper body is supported by rigid gussets for extra rugged applications. Hardened bushings are standard at all pivot points.

Grapples

Similar in application to the skid steer grapples, the excavator grapple is designed to handle objects varying in sizes and shape. Remove large rocks, brush and debris with the excavator grapple. These grapples are not designed for digging or prying. This attachment requires a thumb on the excavator, then the operator can use the bucket curl cylinder to close the grapple. No additional hydraulics are required for operation. Available in sizes from 24" (610 mm) to 42" (1067 mm). Demolition and forestry type applications require additional operator protection, such as a poly-carbonate front window. Check application requirements.

Grapples		Wt. (lbs)	Retail Price

Pavement Removal Bucket

This handy attachment will easily lift, pick and carry concrete slabs from sidewalks, driveways or any construction site. The "ribbed" bottom is designed to prevent denting and wear on the bucket. Features include replaceable pin-on tooth points held in place with rubberized flex pins, and are constructed of high strength T-1 steel.

	50504300 Bucket Pin for Yanmar ViO75, ViO80, SV100 excavator (2 required)				22.0	\$163.00

Quick Attach Couplers • Spring Loaded

T-1 steel is used in all critical and high wear components. Coupler is manually released from attachments and automatically re-engages when operator reconnects the coupler and bucket. A pin is then inserted for added safety.

Thumbs • Rigid

Specifically designed to aid in handling or loading irregular shaped objects that a bucket alone can't handle. Because it easily retracts back against the dipper, it can be left on the machine during normal excavation.

Rigid		Wt. (lbs)	Retail Price
Gehl/Mustang			
503355	Rigid Dual Tine Thumb for Gehl 143, 152, 153, 192, 193, 222, 223, 253 and Mustang 1403, 1502, 1503, 1902, 1903, 2202, 2203, 2503 excavator	180.0	\$2,218.00
503356	Rigid Dual Tine Thumb for Gehl 272, 283Z, 292, 303, 342, 353, 362, 373, 383Z and Mustang 2702, 2803ZT, 2902, 3003, 3402, 3503, 3602, 3703, 3803ZT excavator	180.0	\$2,689.00

503358	Rigid Dual Tine Thumb for Gehl 753Z, 802, 803 and Mustang 7503ZT, 8002, 8003 excavator	310.0	\$3,578.00
Komatsu			
503525	Rigid Dual Tine Thumb for Komatsu PC50 excavator	210.0	\$2,689.00

Thumbs • Hydraulic

Hydraulic thumbs feature a single cylinder and dual tines constructed of high strength steel with serrated edges for added durability and secure clamping. Custom designed for perfect fit up to bucket and compact excavator setup. Must specify bucket, machine model and quick coupler used when ordering. The necessary hoses, hydraulic couplers and relief valves are available and sold separate.

50515404	Thumb, Cylinder Mount, weld on, for Gehl Z17, 153, 223 and Mustang 170Z, 1503, 2203 excavator	7.0	\$129.00
511761	Thumb, Cylinder Mount, weld on, for Gehl Z27, Z35, Z45 and Mustang 270Z, 350Z, 450Z excavator	10.0	\$144.30
512661	Thumb, Cylinder Mount, weld on, for Gehl Z80 and Mustang 800Z excavator	16.0	\$165.00

Augers • Planetary Drive

The gear reduction drive units are designed for heavy-duty use in commercial and industrial applications. This is the ultimate auger attachment for those who demand the best and most durable units. Choose auger drive units and bits in 2-9/16" Round or 2" Hex output shafts. Complete units include the universal skid steer mount, top link, hoses and couplers. All bits sold separately.

2-9/16" Round		Model	Hyd. Req. (gpm/lpm)	Max. Auger Dia. (in/mm)	Speed (rpm)	Theo. Torque (lbs. ft/Nm)	Wt. (lbs)	Retail Price

Augers • Auger Mounts

Choosing the right auger attachment requires experience, but the team at Manitou Americas, Inc. can help you determine the correct auger drive for your machine and application. Factors to consider are: soil condition, hole width and depth, and hydraulic power of your machine. With a full auger line available from Manitou Americas, Inc., we are sure to provide you the correct mounting plate, hydraulic-powered auger drive unit, auger drilling bit, and specialized wear parts for your job.

Auger Mounts		Wt. (lbs)	Retail Price
<i>Universal</i>			
500912	Auger Mount Universal (C, CL & E Series Chain Drive)	132.0	\$305.00
502761	Auger Mount Universal (XL Series Chain Drive)	135.0	\$305.00
501676	Auger Mount Universal (PA150-PA245 Planetary Drive)	140.0	\$305.00

511140	DFB and SQ Toothplate Repair Kit (18" Auger), teeth sold separately	5.0	\$55.08
511141	DFB and SQ Toothplate Repair Kit (24" Auger), teeth sold separately	7.0	\$74.46
511142	DFB and SQ Toothplate Repair Kit (36" Auger), teeth sold separately	10.0	\$122.40

Backhoe, In-Cab • Main Frame

Remain in the comfort and protection of the cab and operate all of the backhoe and skid steer controls while in the seat with the In-Cab Backhoe. Easy to set up. Easy to get in and out of the cab using step on the mainframe, simply pull the control panel toward you and lock into place. Features include 9'4" (2850 mm) digging depth, 10'11" (3340 mm) reach and 180 degree pivot rotation. Vertical stabilizers and side-shift features allow you to operate next to buildings, fence lines or other obstacles. Four bucket sizes from 12" (300 mm) to 24" (600 mm) for any size trenching job. Comes standard with auxiliary hydraulics, hoses and flat face couplers.

Main Frame		Model	Digging Depth (in/mm)	Hyd. Req. (gpm/lpm)	Reach (in/mm)	Side Shift	Overall Width (in/mm)	Stabilizer	Wt. (lbs)	Retail Price
503626	Backhoe, In-Cab Controls 9'4", Side-Shift	BH09IC	112/2850	11-15/41-60	131/3340	40 in/1016 mm	61.5/1562	Vertical	1150.0	\$10,902.00

Backhoe, In-Cab • Buckets

The right size backhoe bucket will allow your backhoe attachment and skid steer to be even more versatile. Bucket sizes range from 12" to 24" and come with teeth.

Buckets		Wt. (lbs)	Retail Price
503630	12" (300 mm) In-Cab Backhoe Bucket with 3 pin-on teeth	120.0	\$499.00
503631	16" (400 mm) In-Cab Backhoe Bucket with 3 pin-on teeth	160.0	\$510.00
503632	20" (500 mm) In-Cab Backhoe Bucket with 4 pin-on teeth	200.0	\$607.00
503633	24" (600 mm) In-Cab Backhoe Bucket with 4 pin-on teeth	240.0	\$680.00
Replacement Parts			
50515103	Bucket Tooth Pin	0.3	\$27.54
50515102	Bucket Tooth	2.0	\$41.82

Backhoe, In-Cab

Choose the required backhoe upper and lower quick attach mounts, mounting arm hooks and mount pins that correspond to the skid steer loader the backhoe will be attached to.

Backhoes • Main Frame

The backhoe attachment gives you the power to handle excavation jobs with your skid steer or track loader. Dig utility trenches and septic tanks quickly without bringing another large piece of equipment to the job site. This powerful backhoe models feature 180 degree boom pivot rotation and offer digging depths from 8'5" (2565 mm) to 11'1" (3378 mm), with bucket digging forces from 3895 lbs (17.3 kN) to 6200 lbs (27.6 kN). For machines with cab enclosures, door must be removed for backhoe installation.

Main Frame		Model	Overall Width (in/mm)	Hyd. Req. (gpm/lpm)	Digging Depth (in/mm)	Wt. (lbs)	Retail Price
<i>No Mount</i>							
503306	BH485 Backhoe Base Unit (add backhoe half mount, loader half mount and bucket)		BH485	60/1524	9-13/34-49	101/2565	1010.0 \$9,077.00

Backhoes, Mini • Fixed

Mini Backhoes fixed model has a digging depth of 73", an overall reach of 75" from the mounting plate, and a bucket dig force of 3895 lbs. Comes complete with hoses and flat face couplers - stabilizers are not required. A relief valve is required in the bucket tilt circuit of the skid steer loader. Contact Manitou Americas, Inc. for more information regarding optional hydraulic relief valve.

Backhoes, Mini • With Swing

Mini Backhoes with Swing model features in-cab electric controls and a 140 degree rotation cushioned swing cylinder for smooth operation. This model has a digging depth of 76", an overall reach of 78" from the mounting plate, and a bucket dig force of 3800 lbs. Comes complete with control box, hoses and flat face couplers - stabilizers are not required. A relief valve is required in the bucket tilt circuit of the skid steer loader. Contact Manitou Americas, Inc. for more information regarding optional hydraulic relief valve.

Bale Movers • Round

Single and Double Round Bale Spears will move round bales up to 3,000 lbs. The single round main shaft is reinforced with two 12" stabilizer shafts to keep the bales closer to your machine and ensures safer handling. Tine Type is main tine only.

Round		Model	Cap. (lb/kg)	Tine Type	Main Tine (qty, in/mm)	Stabilizer Tine (qty, in/mm)	Wt. (lbs)	Retail Price
<i>Universal</i>								
* 503460	Single Round Bale Spear - 42", 2200 lb. capacity		SSB2200	2200/998	Turned Steel	1, 42/1067	2, 12/305	129.0 \$519.00
* 503461	Double Round Bale Spear - 42", 3000 lb. capacity		SSB3000	3000/1360	Turned Steel	2, 42/1067	0	146.0 \$612.00
<i>Replacement Parts</i>								
512819	12" (305 mm) x 1" diameter (25.4 mm) Spike/Bale Spear							2.0 \$8.78
	514943	Nut (5/16" diameter)						0.2 \$0.20
	50515555	Bolt (1-3/4" long x 5/16" diameter)						1.0 \$1.10
	50515556	Lock Washer (5/16" diameter)						0.1 \$0.10
514331	42" Bale Spear Tine, Bolt in for SSB and SSRB Bale Spears							7.0 \$97.00

Blades • Dozer

Scraping and leveling projects are completed quickly and easily. Dozer blades are available in sizes ranging from 72" (1828 mm) to 108" (2743 mm) and feature 30 degree right and left angling, and 10 degree right and left tilt. Dozer blades have replaceable cutting edges, hoses and flat-faced couplers included. NOT to be used for snow removal. Control harness adapters are sold separately under "optional equipment". Dozers must be ordered with an adapter.

Dozer		Model	Straight Path (in/mm)	Angled Path (in/mm)	Angle (degrees)	Tilt (degrees)	Height (in/mm)	Wt. (lbs)	Retail Price

Blades • Trip Edge Snow Blades

Standard Duty Trip Edge Snow Blade has up to 8 degrees of oscillation. The blade features two compression springs allowing the 5/8" x 8" reversible steel cutting edge to trip if it comes in contact with a hidden object. The blade construction allows full down pressure to keep in contact with the area being cleared. Other features include a single hydraulic cylinder that angles up to 30 degrees and adjustable skid shoes. Recommended for loaders with operating capacity no larger than 1,800 lbs. Comes complete with hoses and flat face couplers.

Standard Duty		Model	Overall Width (in/mm)	Angled Path (in/mm)	Angle (degrees)	Oscillation (degrees)	Height (in/mm)	Wt. (lbs)	Retail Price

Blades • Trip Edge Snow Blades

Heavy Duty Trip Edge Snow Blades have up to 8 degrees of oscillation. The blade features four compression springs allowing the 5/8" x 8" reversible steel cutting edge to trip if it comes in contact with a hidden object. It's heavy duty design allows full down pressure to keep in contact with the area being cleared. Other features include right and left hydraulic angle up to 30 degrees and adjustable skid shoes. Recommended for loaders with operating capacity greater than 1,500 lbs. Comes complete with hoses and flat face couplers; optional wing kit sold separately.

Blades • V-Blades

The V-Blade increases your compact loader's productivity by efficiently plowing snow. The V-Blades feature four compression springs allowing the 5/8" x 8" reversible steel cutting edge to trip if it comes in contact with a hidden object. The V-Blade also oscillates up to 8 degrees and angles up to 30 degrees and can be configured into 5 positions: V-shape, scooped, straight, right and left. Come standard with reversible steel cutting edge and are available in sizes ranging from 48" (1219 mm) to 120" (3048 mm). Comes complete with hoses and flat face couplers; an optional wing kit is also available.

Boom Lift

Use this multi-purpose skid steer Boom Lift for loading and unloading attachments or construction materials from hard-to-reach areas, moving and transporting trees, placing and removing concrete forms and more. A simple and economical attachment to make your equipment more versatile.

Boom Lift		Model	Length (in/mm)	Cap. (lb/kg)	Wt. (lbs)	Retail Price
<i>Universal</i>						
501664	Boom Lift	TB77	59.25/1505	3500/1588	182.0	\$665.00

Breakers • Breaker

Break concrete quickly and easily into load-ready debris. Only two moving parts provide enough power to break through the toughest materials. Breaking force is generated by the hydraulic flow and pressure of the compact loader and a nitrogen charged backhead increases the impact energy maximizing hammer production. The advanced hydraulic circuit provides increased flow to the valve and piston, resulting in faster cycle times, increased tool penetration and more productivity per hour. There are no Through-bolts to constantly torque or replace, and the front wear bushing is easily replaced so your hammer is always in perfect working condition. Manitou Americas, Inc. has models available from the 375 ft/lb impact energy class to 1,000 ft/lb impact energy class. This breaker comes standard withmoil point tool, hoses, hose saver kit and flat-face couplers.

Breaker		Model	Hyd. Req. (gpm/lpm)	Impact Energy Class (lb-ft/J)	Cycles/Blows per Minute	Wt. (lbs)	Retail Price
<i>Universal</i>

Brooms • Angle

The angle broom cleans up just about anything, anywhere! This attachment can be used year-round and is an excellent tool to assist in removal of snow or debris on sidewalks, parking lots and more. All brooms feature 50/50 poly/wire combo brush material. Brooms are available in widths ranging from 48" (1219 mm) to 96" (2438 mm), and have a manual angle up to 30 degrees - hydraulic angle kits optional. All angle brooms also feature a fold-away stand to protect the bristles in storage. An optional Dust Control Kit helps to reduce dust and flying debris. Comes complete with hose saver kit, hoses and flat face couplers.

Brooms • Pickup / Hopper

This bi-directional collection broom allows you to sweep in forward and reverse, and gives excellent performance in milling, material pickup, road maintenance and job-site cleanup. This is a cost-effective investment for contractors and rental houses. The hopper broom is a single-motor broom and comes in widths ranging from 60" (1524 mm) to 84" (2133 mm). The hopper broom is also available with a waterless dust abatement system in widths ranging from 60" (1524 mm) to 84" (2133 mm). Optional Dust Control Kit helps reduce dust and flying debris. Optional Gutter Brush attachment helps remove debris from curbsides and hard to reach areas. Comes complete with hoses, couplers, and bolt-on cutting edge.

Buckets • Dirt/Construction

Manitou Americas, Inc. offers Dirt/Construction buckets as Standard/Extended or Heavy Duty (both without or with flush mounted teeth) and as standard, high, or low heel. All of these buckets feature .75" (19 mm) cutting edge thickness, 34.6" (879 mm) depth and 20.5" (521 mm) height. Excellent cutting edge visibility and high breakout force are the trademarks of these buckets.

Buckets • Utility

Utility buckets have a higher capacity than the dirt/construction bucket, but without the high back of the bulk material bucket. The Utility buckets work great in farming applications, such as for hauling manure and fertilizer.

Buckets • Bulk Material/Snow

Bulk Material buckets are available in standard, medium-duty and heavy-duty models. The high-strength steel construction has proven durable on all brands of skid steers. Weld on edge is 6" (152 mm) x 3/4" (19 mm) thick. Standard-Duty buckets are recommended for less than 2400 lbs. Medium-Duty buckets include an 8" mesh window for increased visibility and are recommended for greater than 1800 lbs. Heavy-Duty buckets include a 12" mesh window for even greater visibility and are recommended for greater than 2400 lbs. Pictured is the Standard Universal bulk material bucket. The Standard Non-Universal material bucket features higher side plates.

Bucket Accessories • Bolt-on Edges

Bolt-on cutting edges extend the life of a bucket by adding a wear edge to the front of the bucket. Bolt-on edges have a double bevel so they are reversible—extending the life of the edge itself. Serrated edges have a single bevel. Various thickness and width options are available to fit your bucket exactly.

CTC = bolt hole center to center distance. H = number of holes drilled in cutting edge.

Buckets, 4-in-1 Combination

Use one bucket for a wide variety of applications such as site cleanup, grading, scraping, grappling, dozing dirt, brush removal, material spreading and more. High strength steel clam shell bottom is designed to prevent bowing with heavy material and two large, guarded cylinders provide powerful clamping. Sizes range from 60" (1524 mm) to 84" (2134 mm) with standard, heavy-duty and heavy-duty with teeth models to choose from. Heavy-duty buckets feature reinforcement plates and a holding valve to keep clam in locked position. All 4-in-1 Buckets come standard with 3/4"x6" weld-on cutting edges with holes, as well as bolt-on cutting edges for the front dozer edge and rear of the clam edge.

Buckets, High Dump

The High Dump Bucket is ideal for loading feed mixers and trucks. This bucket features two heavy-duty hydraulic cylinders that pivot the bucket for dumping, increasing your vertical lift by approximately 44" and horizontal reach by approximately 13". A see-through spill guard allows greater visibility and an optional bolt-on cutting edge is also available. Recommended for loaders with operating capacities greater than 1800 lbs. Comes complete with hoses and flat face couplers.

High Dump Bucket		Model	Overall Width (in/mm)	Heaped Cap. (ft ³ /m ³)	Height (in/mm)	Depth (in/mm)	Pivot (degrees)	Wt. (lbs)	Retail Price

Buckets, Manure Slurry

The Manure Slurry Bucket is ideal for cleaning free stall barns or for removing any liquid waste product such as storm water run-off. It features high-strength steel construction with a top formed profile to limit spillage and a rolled inside profile for easier clean out. The standard bolt-on side wear edges are reversible and replaceable. The optional front bolt-on cutting edge is sold separately.

Buckets, Skeleton Rock

Designed for picking up stones and large, awkward debris, the skeleton rock bucket is a "must have" for skid steer operators in the agricultural, commercial, and landscaping industries. The grated bottom allows dirt to fall through.

Skeleton Rock		Model	Overall Width (in/mm)	Tine Spacing (in/mm)	No. of Tines	Height (in/mm)	Depth (in/mm)	Wt. (lbs)	Retail Price

Buckets, Skeleton Rock • Skeleton Rock Grapple

The Skeleton Rock Grapple is designed to scrape with loader arms against boom stops. Its see-through design allows for excellent visibility, and the design offers complete protection of the hose routing. Features bushings at all pivot locations and fully gusseted tine tips. This attachment is available in widths from 60" (1524 mm) to 84" (2083 mm). Comes complete with hoses and flat face couplers.

Skeleton Rock Grapple		Model	Overall Width (in/mm)	Tine Spacing (in/mm)	No. of Tines	Depth (in/mm)	Cylinder Size(s) (in/mm)	Grapple Opening (in/mm)	Wt. (lbs)	Retail Price

Buckets, Utility Fork

Utility Fork buckets are extremely efficient in moving loose items such as hay, manure, branches and limbs. Ideal uses include landscaping and agricultural applications. The design of the unit allows for good visibility of the load as well as allowing the fork to get close to fences or sides of stalls or buildings. Available in sizes from 54" (1372 mm) to 78" (1981 mm).

Utility Fork		Model	Overall Width (in/mm)	Height (in/mm)	Depth (in/mm)	Tine Spacing (in/mm)	Tine Dia./Width (in/mm)	Wt. (lbs)	Retail Price

Cold Planers • Standard Flow

An invaluable tool for road construction and maintenance crews. Asphalt and concrete are quickly milled due to the high torque generated by the planetary gearbox. Standard-flow planers feature hydraulic side-shift controls and manual tilt/depth controls. Comes complete with hoses, hose saver kit, flat-faced couplers and asphalt picks.

Standard Flow		Model	Hyd. Req. (gpm/lpm)	Tilt (degrees)	Max. Depth (in/mm)	No. of Picks	Working Width (in/mm)	Sideshift (in/mm)	Wt. (lbs)	Retail Price

Cold Planers • High Flow

An invaluable tool for road construction and maintenance crews. Asphalt and concrete are quickly milled due to the high torque generated by the planetary gearbox. High flow models feature electro-hydraulic side shift, tilt/depth control and are single-circuit with 3 hydraulic lines. Comes complete with wire harness and control box, hoses, hose saver kit, flat-faced couplers and asphalt picks.

Cold Planers • High Flow Heavy Duty

The 40" Heavy Duty High Flow Cold Planer is our most advanced model featuring an electric controller to operate the hydraulic side-shift, tilt, milling depth and optional dust control water kit. Two depth gauges on drum housing and easy-open access door for quick maintenance to picks. These heavy-duty machines are single-circuit with 3 hydraulic lines. High torque is generated by a tough planetary gearbox and right side wheel assembly is removable to get close to obstacles or buildings. Comes complete with hoses, hose saver kit, large flat-faced couplers and asphalt picks.

High Flow Heavy Duty		Model	Hyd. Req. (gpm/lpm)	Tilt (degrees)	Max. Depth (in/mm)	No. of Picks	Working Width (in/mm)	Sideshift (in/mm)	Wt. (lbs)	Retail Price

Concrete Tools • Auger Mixing Bucket

The universal skid steer mounting on front and back allows right and left discharge. This specialized attachment has the ability to self-load from large piles. Handles most materials, including 1" (25.4 mm) slump concrete, loam, sand, washed gravel up to 3/4" (19 mm), agricultural grains and more. It features a 1/3 yd³ (9 ft³) Mixing Capacity and a 1/2 yd³ (13.5 ft³) Total Capacity, horizontal steel auger with rubber fighting, orbital motor drive and two multi-lined chutes for extended placement and efficient flow. Comes complete with a 24" and 36" chute, hoses and flat face couplers.

Auger Mixing Bucket		Model	Hyd. Req. (gpm/lpm)	Height (in/mm)	Cap. (ft ³ /m ³)	Wt. (lbs)	Retail Price

513665	Rubber Fighting Kit (13 rubber discs and hardware)					20.0	\$250.00

Concrete Tools • Mixer

The mixer's welded steel drum and internal paddles offer uniform mixing and clean dumping. A direct hydraulic drive of the gearbox eliminates chain and sprocket maintenance, resulting in more up-time on the job. The mixer features a capacity of 5 ft³ (.142 m³) and a total drum capacity of 11 ft³ (.311 m³). Comes complete with parking stand, adjustable drum speed control valve, hoses and flat face couplers.

Concrete Tools • Concrete Placing Bucket

This skid steer attachment is designed to accurately, quickly and neatly carry and place concrete in tight areas or locations that cannot support a cement truck. The concrete placement bucket is ideal for pouring backyard patios, footings or into formed columns or walls. Sizes available are 1/2 and 3/4 cubic yard capacities. Standard features include a hydraulic gate control and 30" (762 mm) chute extension. Includes hoses and couplers.

Concrete Placing Bucket		Model	Cap. (ft ³ /m ³)	Height (in/mm)	Width (in/mm)	Carrier Cap. (lb/kg)	Chute Length (in/mm)	Wt. (lbs)	Retail Price

500231	Male and Female Flat Face Coupler Kit, #12 Female O-Ring Boss							2.0	\$70.38

Concrete Tools • Slab Lifter Bucket

The Slab Lifter Bucket allows you to quickly and easily lift, remove and transport entire slabs of concrete on sidewalks, driveways and any construction site. It features three heavy-duty teeth with 1-1/2" (38 mm) shanks made of T-1 steel and replaceable points with rubberized flex pins. The Slab Lifter Bucket is a great addition to keep your skid steer working hard, full-time!

Slab Lifter Bucket		Model	Height (in/mm)	Depth (in/mm)	Working Width (in/mm)	Slab Thickness (in/mm)	Wt. (lbs)	Retail Price

Grader Blade • Grader

The Grader Blade attachment can turn your skid steer into a high-performance grading machine. It features a 96" (2438 mm) blade, control box for in-cab hydraulic control of angle and tilt, and a reversible/replaceable cutting edge. Also features a proportional current valve to gradually adjust the blade height, angle and tilt. It is ready to accept the laser control system for perfect grading. Comes complete with hoses and flat face couplers. Shown with optional End Plates.

Grader Blade		Model	Width (in/mm)	Length (in/mm)	HP Req.	Wt. (lbs)	Retail Price

514246	Shear Pins with Clips (10 pack)					2.0	\$26.52
514122	95.5" (2426 mm) Cutting Edge with 10 holes, Grader Blade					72.0	\$177.91

Grader Blade • Laser System

Use the optional Laser System with an Grader Blade for a perfect grade every time! Contractors can appreciate the automatic and self leveling features for simple, precise control that results in material and labor savings. The transmitter features -5 to +25% grade capability in either axis (-5 to +15% in both axes) and high accuracy up to 3,608 ft. Perfect for building pads, parking lots and runways, land leveling or tilling, concrete forming and framework, retention ponds and batters, setting foundations and footings.

Laser System		Wt. (lbs)	Retail Price
50504374	Laser Receiver Kit (includes carry case and cable) (2 required) for Grader Blade	11.0	\$2,400.00

Grapples • Grapple Buckets

Move heavy, hard-to-handle materials on the construction site or anywhere you need to! Grapple buckets are available in Standard, Medium and Heavy Duty models in widths from 60" (1524 mm) to 88" (2235 mm). They feature independently operating grapple arms for powerful clamping on uneven loads. Our grapple buckets feature enclosed cylinders and hoses to protect against debris and come complete with hoses and flat face couplers. Some larger skid steer loaders and most compact track loaders may require hose extensions for supply hoses.

Grapples • Brush Root Grapple Standard

The standard duty brush root grapple is designed for handling awkward materials such as logs, tree stumps, brush, loose hay or straw. The 38", 44", 48" and 54" grapples feature one cylinder and grapple arm, and the 60", 66", 72", 78", and 84" grapples feature two cylinders and two grapple arms. Comes complete with hoses and flat face couplers. Some larger skid steer loaders and most compact track loaders may require hose extensions for supply hoses.

Grapples • Brush Root Grapple Heavy Duty

The heavy duty brush root grapples are full-featured units with dual, independent grapples arms to handle uneven loads, cushioned cylinders and cylinder/hose guards to protect all cylinder components, hardened 1-1/4 cylinder pivot pins, 100,000 PSI yield strength tine material for increased durability, and standard load check valve for positive clamp force. Comes complete with hoses and flat face couplers. Some larger skid steer loaders and most compact track loaders may require hose extensions for supply hoses.

Grapples • Skeleton Rock Grapple

The Skeleton Rock Grapple is designed to scrape with loader arms against boom stops. It's see-through design allows for excellent visibility, and the design offers complete protection of the hose routing. Features bushings at all pivot locations and fully gusseted tine tips. This attachment is available in widths from 60" (1524 mm) to 84" (2083 mm). Comes complete with hoses and flat face couplers.

Grapples • Industrial Tine Grapple

Excellent for moving heavier, hard to handle materials such as logs, brush and scrap materials. This heavy-duty attachment makes those tough jobs easy. Five models range in size from 60" (1524 mm) to 84" (2133 mm). Grapples function independently to allow for uneven loads. Hoses and couplers are included.

512118	Hose Kit, (includes 2 #6 JIC x 80" hoses with flat face couplers)							12.0	\$234.60

Hitch Adapter

A handy, economical attachment every skid steer operator should have. Move implements, trailers, wagons, boat trailers or other types of equipment easily and efficiently with the Hitch Adapter. Reduce equipment damage by having full view of the equipment as you are moving, and maximize storage space by precisely placing equipment. The Hitch Adapter utilizes a Class 3 receiver, and the universal mount means that it will fit any skid steer loader. It features durable, heavy steel construction frame.

Hitch Adapter		Model	Height (in/mm)	Width (in/mm)	Depth (in/mm)	Wt. (lbs)	Retail Price
<i>Universal</i>

Land Levelers • Without Scarifier

This Land Leveler provides fast and efficient finish grading and is capable of aggressive cutting and fine finishing. Features unique brackets on top of the frame to set a bucket on and take less space on a trailer when transporting (note: bucket will still need to be secured before transporting). Comes with bolt on reversible cutting edges. Optional scarifier allows you to loosen hard ground while grading.

Without Scarifier		Model	Overall Width (in/mm)	No. of Teeth	Working Width (in/mm)	Wt. (lbs)	Retail Price
<i>Universal</i>

Land Levelers • With Scarifier

Nine 6" long teeth dig in and break up hard packed soil. A 1.5" (38 mm) x 6" (152 mm) hydraulic cylinder engages the scarifier teeth. Features unique brackets on top of the frame to set a bucket on and take less space on a trailer when transporting (note: bucket will still need to be secured before transporting). Comes complete with bolt on reversible cutting edges, hoses and flat face couplers.

With Scarifier		Model	Overall Width (in/mm)	No. of Teeth	Working Width (in/mm)	Tine Length (in/mm)	Wt. (lbs)	Retail Price

Log Grapple • Log Grapple

This is an excellent attachment for handling logs, pipes, brush and other bulky materials. It features 2" x 8" cylinders, and will close to a log or pipe as small as 6". Includes hoses and flat-faced couplers. Capacity must be based on load capacity of the skid steer loader not the attachment.

Log Grapple		Model	Overall Width (in/mm)	Tine Length (in/mm)	Cylinder Size(s) (in/mm)	Opening Height (in/mm)	Cap. (lb/kg)	Wt. (lbs)	Retail Price

Material Unroller

The material unroller's stem is used to pick up erosion control material rolls off of a truck, and can hydraulically pivot 180 degrees to unroll erosion control material on either side of the skid steer loader. It has a free wheeling stem hub, and the arm floats above or below horizontal position; it can be locked into upright position for transport as well. Contractors can cut their labor in half! Comes complete with hoses and flat face couplers.

Mowers • Heavy Duty Rotary Brush Cutter

The Rotary Brush Cutter is powerful enough to handle your most demanding cutting jobs. This aggressive brush cutting machine is engineered to cut brush and trees up to 8 inches in diameter and clear even the most rugged and overgrown terrain. This direct drive unit features 3 steel blades for the most efficient mulching of trees and a deck support structure made of 3/8" A-36 steel. A steel cushion valve protects the motor and this heavy duty brush cutter requires 30-40 gpm high flow hydraulics. Constructed of 3/8" A-36 steel, this brush cutter is tough enough to provide many years of dependable service.

Mowers • Rotary Brush Mower

Rotary Mowers are designed to cut through the thickest brush and glide over rough terrain with ease. Built for performance to handle heavy weeds, undergrowth, brush and small saplings up to 4" (102 mm) in diameter. It will mow brush down, but won't bog down your motor. Ideal applications include clearing trails for horses, snowmobiles, skiing or biking in areas that would normally be inaccessible. Rotary brush mowers are available in widths from 48" (1219 mm) to 90" (2286 mm) for standard or high-flow hydraulic systems. Brush mowers feature a direct drive hydraulic motor requiring 8-40 gpm and a heavy duty stump jumper. Comes complete with hoses and flat face couplers.

Mulcher

The Brush Mulcher attachment is designed for efficient mulching of brush in land clearing applications on standard-flow hydraulics. This powerful machine is equipped with a safety push bar to force brush or small trees up to 6" in diameter down and allow the mulcher teeth to contact the lower portion of the brush to mulch it. The rest of the plant is mulched as the machine moves through the working area. Skid shoes keep the grinding at ground level or up to 1" below grade. Features include 96 carbide-tipped teeth for long tooth life, smooth operations and fine mulch. The rotor is designed with 6 staggered rows of teeth around the circumference that cut into and mulch wood material as it moves into the rotor. It also features a rear chain shield and a gauge on the back of the mulcher for the operator to monitor hydraulic pressure while operating. A relief valve in the hydraulic circuit is also featured to prevent overloading of any drive components. Comes with hoses and flat face couplers.

Brush Mulcher		Model	Hyd. Req. (gpm/lpm)	No. of Teeth	Digging Depth (in/mm)	Working Width (in/mm)	Overall Width (in/mm)	Wt. (lbs)	Retail Price

Onboard Scale

The onboard scale measures, displays and records the dynamic or static weight of a load on or in a bucket, combination bucket, grapple or pallet fork. It measures the hydraulic pressure in the lift arm circuit as the load is lifted past a sensor. An ideal accessory for measuring mulch, stone, feed or other materials in the loader bucket. Weigh material as it is being loaded into a dump truck and prevent expensive over-weight tickets!

The WL100 onboard scale is not compatible with closed-center hydraulic systems.

	Model	Suitable For	No. of Channels	Load Sensor Rating (psi/bar)	System Accuracy	Temperature Range (F/C)	Wt. (lbs)	Retail Price

Pallet Forks • Standard Duty Frames

Custom-brand **YOUR DEALER NAME** FREE!

Standard duty pallet forks are ideal for many types of material handling jobs. Offering great strength along with a great price. Side steps and tapered frame make getting in and out of the cab easy, and the see-through brick guard provides great visibility. **INDIVIDUAL TINES SOLD SEPARATELY.**

Standard Duty Frames		Model	Cap. (lb/kg)	Width (in/mm)	Tine Type	Wt. (lbs)	Retail Price
<i>Universal</i>							
50503777	Pallet Fork Frame - Standard Duty	PFS	3800/1724	45.5/1156	Class II	128.0	\$345.00

Pallet Forks • Medium Duty Frames

Custom-brand **YOUR DEALER NAME** FREE!

Medium duty pallet forks offer the strength and durability that you would expect, with the convenience of a walk-through style frame, allowing easier access to and from the cab. Includes spill guard. Recommended for machines with a cab enclosure. **INDIVIDUAL TINES SOLD SEPARATELY.**

Medium Duty Frames		Model	Cap. (lb/kg)	Width (in/mm)	Tine Type	Wt. (lbs)	Retail Price
<i>Universal</i>							
50503286	Pallet Fork Frame - Medium Duty, Walk-Through	PFM	4500/2041	45.5/1156	Class II	178.0	\$470.00

Pallet Forks • Pallet Fork Grapple

Single cylinder grapple featuring a unique jaw action which pulls material toward the frame as jaw closes. Class II frame with 4 options to pin the cylinder to the grapple, maximizing grapple opening or closing force. Position can be changed in minutes for clamping small pipe to large culverts. Can also be used for moving loads of plywood or other building materials. **INDIVIDUAL TINES SOLD SEPARATELY.** Comes complete with hoses and flat face couplers.

Pallet Forks • Non-Universal Frames

Non-Universal rail-style fork frames have a notched bar across the back where the forks attach and slide back and forth. Lift a lever to move the forks from side to side. A brick guard is standard equipment. **INDIVIDUAL TINES SOLD SEPARATELY.**

Non-Universal Frames		Wt. (lbs)	Retail Price
<i>Non-Universal</i>			
500820	Pallet Fork Frame - Standard Duty, Gehl 25 Series		300.0 \$725.00
50503869	Pallet Fork Frame - Standard Duty, Gehl 3725, 3825		148.0 \$385.00
501354	Pallet Fork Frame - Standard Duty, Mustang Single Pin		148.0 \$699.00

Pallet Forks, Hydraulic • Rotating

Hydraulically control pallet fork rotation right from the cab of your skid steer loader. Tines are manually adjustable. Ideal for loading palletized materials on uneven surfaces. 180 degree one direction rotation and walk-through design allows easy access in and out of the cab. Comes complete with hoses and flat face couplers.

Rotating		Wt. (lbs)	Retail Price
<i>Universal</i>			
501942	Rotating Pallet Fork 180 degrees with 48" (1219 mm) Tines, 3700 lb. capacity	700.0	\$4,370.00

Pallet Forks, Hydraulic • Sidsheft

These pallet forks hydraulically shift side to side from the skid steer cab. Features 16" (60 mm) travel - 8" (30 mm) right or left. Tines are manually adjustable. Walk-through design allows easy access in and out of the cab. Comes complete with hoses and flat face couplers.

Sidsheft		Wt. (lbs)	Retail Price
<i>Universal</i>			
501868	Side Shift Pallet Fork with 42" (1067 mm) Tines, 3700 lb. capacity	770.0	\$2,877.00
* 501781	Side Shift Pallet Fork with 48" (1219 mm) Tines, 3700 lb. capacity	790.0	\$2,898.00

Pallet Forks, Hydraulic • Sliding Tine

Hydraulically control the position of the pallet fork tines from the cab. These pallet forks are ideal for clamping. Tines are adjusted in and out equally to keep the load centered. Walk-through design allows easy access in and out of the cab. Comes complete with hoses and flat face couplers.

Sliding Tine		Wt. (lbs)	Retail Price
<i>Universal</i>			
501731	Sliding Tine Pallet Fork with 48" (1219 mm) Hydraulic Sliding Tines, 5500 lb. capacity	560.0	\$3,280.00

Post Driver

Essential for landscapers, grounds keepers and rental centers, the post driver can drive posts as wide as 10.875" (276 mm) into the ground, with finished posts 53" (1346 mm) above ground. Skid steer maneuverability allows the unit to be easily moved around buildings, storage sheds, trees and other obstacles, with minimal hydraulic power. The hydraulic post driver produces a driving action to eliminate air pockets in the soil and provide an immediate air-tight post set. Self-contained hydraulics for easy hook up. Tilts front to back (F) and side to side (S).

Post Driver		Model	Hyd. Req. (gpm/lpm)	Tilt (degrees)	Impact at Full Stroke (lb/kg)	Max. Post Size	Wt. (lbs)	Retail Price

Post Pounder and Puller

The Post Pounder and Puller is the one essential tool needed for cost effective fence installation and demolition all in one. This one-person operation can drive fence posts as wide as 10 inches and up to 10 feet long into the ground in minutes. No need to ever touch the post by hand. Simply use the attachment to pick up the post, position it using the 12" plumb chain and drive it into the ground with finished posts as low as 18" above ground. Not recommended for use with decorative posts or cyclone pipe posts. This cost-effective tool can also be used to remove wooden or metal fence posts quickly and easily. Ideal for use in agricultural applications or for property line fences with solid steel or wood posts. Recommended minimum skid steer lift capacity of 1650 lbs. Comes complete with hoses and couplers. Shown with optional T-Post adapter.

Rock Wheel

An efficient and precise attachment that makes road or utility cuts in up to 15 feet per minute! The EDGE Rock Wheel cuts widths of 2.5" and 4.5" (64 mm to 114 mm) and depths of up to 24" (610 mm). Features hydraulic height adjustment and side-shift capability for cutting close to buildings, obstacles or in confined spaces. Rock wheels are available in single or dual circuit models. Each Rock Wheel will include hoses. Couplers and adapters sold separately. Optional dust control kit helps lubricate carbide teeth for optimal tooth life. This is a high-flow attachment ONLY.

	Model	Hyd. Req. (gpm/lpm)	Speed (rpm)	No. of Teeth	Depth (in/mm)	Working Width (in/mm)	Productivity (ft/m per minute)	Wt. (lbs)	Retail Price

* 501211	Hose Saver Kit						2.5	\$66.00

Scarifiers

The Eliminator Scarifier Rake has the ability to go from an unfinished to a finished seed bed with one easy-to-use attachment. There are no moving parts or hydraulic hookups to slow you down - just attach it and go! Loosen hard soil, remove scrub and small vegetation, and prepare soil to produce a perfect grade. This unit works in either forward or reverse, and is available in two sizes: 72" (1828 mm) and 84" (2133 mm). (Eliminator is a registered trademark of Loegering.)

Scrapers • Feed/Alley

The feed/alley scraper features a 1-1/2" x 10" reversible replaceable rubber blade with 3" of wear per side of edge that is easy on concrete or tiled floor mangers. The 5 off-set adjustments keep feed away from tires while the 8 angle adjustments allow for efficient movement of feed.

	Model	Angle (degrees)	Angled Path (in/mm)	Overall Width (in/mm)	Height (in/mm)	Wt. (lbs)	Retail Price
<i>Feed/Alley Universal</i>							
503290	96" Feed Alley Scraper	FAS96	38.4-71.7	75.2-30.1/1910-765	96/2438	20/508	520.0 \$1,661.00

Scrapers • Manure

This attachment is an excellent tool for cleanup in free-stall barns. The backdrag allows it to efficiently clean out corners and pull material away from walls. Features reversible 1.5" thick x 10" high rubber compound edges.

	Model	Overall Width (in/mm)	Overall Ht. (in/mm)	Depth (in/mm)	Wt. (lbs)	Retail Price
<i>Manure Universal</i>

Silage Defacer

The Silage Defacer is perfect for farmers with open-pit silage bunkers. It reduces spoilage by exposing less surface area to air and moisture. The open design allows operators to see the bunker face when working, and there are adjustable guides for depth of cut up to 3". Maintenance is easy with a ratchet cam chain tension adjustment. Comes complete with hoses and flat face couplers.

<i>Replacement Parts</i>								
50515592	Hose Saver Kit 5/8" ID						2.0	\$49.00

Silt Fence Installer

This unique attachment allows installation of silt fence effectively and effortlessly by a single operator. The silt fence installer has a single-fold design for ease of material loading. Unique pivoting design allows installation around tight corners and a coulter cuts through grass or sod for easy installation of silt. One machine size handles 36", 42" and 48" fabric rolls. 3-Point models (SFIT) include storage stands (shown).

Slab Lifter Bucket

A Slab Lifter Bucket allows you to quickly and easily lift, remove and transport entire slabs of concrete on sidewalks, driveways and any construction site. It features three heavy-duty teeth with 1-1/2" (38 mm) shanks made of T-1 steel and replaceable points with rubberized flex pins. A Slab Lifter Bucket is a great addition to keep your skid steer working hard, full-time!

Slab Lifter Bucket		Model	Height (in/mm)	Depth (in/mm)	Working Width (in/mm)	Slab Thickness (in/mm)	Wt. (lbs)	Retail Price

Snow Blower

With the Snow Blower attachment, you can remove snow from sidewalks, driveways or any area your skid loader will fit. Widths range from 4-ft. (1.2 m) to 8-ft. (2.4 m), and they can throw snow up to 45-feet (13.7 m). The poly-lined, hydraulically controlled chute and deflector has a 280 degree radius, so you can easily put the snow where you want it! Snow blowers are available for standard or high-flow hydraulics. Optional truck chute kit available for high flow G & H models.

Snow Blower

With the Snow Blower attachment, you can remove snow from sidewalks, driveways or any area your skid loader will fit. Widths range from 4-ft. (1.2 m) to 8-ft. (2.4 m), and they can throw snow up to 45-feet (13.7 m). The poly-lined, hydraulically controlled chute and deflector has a 280 degree radius, so you can easily put the snow where you want it! Snow blowers are available for standard or high-flow hydraulics. Optional truck chute kit available for high flow G & H models.

Snow Push • Oscillating

The Oscillating Snow Push attachments feature a heavy duty frame that oscillates up to 8 degrees along uneven surfaces to keep the edge in contact with the surface being cleared. Floating side plates and frame link allow the pusher weight to be transferred onto the edge. These Snow Pushes can also be used year round to move other materials such as flood-cleanup wastewater or manure. Comes with a reversible, replaceable rubber cutting edge with 3" of wear per side. Widths from 84" (2133 mm) to 120" (3048 mm) allow you to select the right size for your skid steer and your job. Optional Pull-Back Kits allow for down pressure on the rubber edge to draw snow or other materials away from confined spaces such as loading docks or buildings. This Pull-Back Kit includes the rubber cutting edge.

Snow Push • Low Profile

The Low Profile Snow Push attachments provide operators with great visibility on smaller machines and have the capacity to move up to 192 cubic feet of snow. The Low Profile Snow Push also works well for flood clean-up wastewater, manure and other materials. Comes with rubber cutting edge and adjustable skid shoes. Widths from 72" (1828 mm) to 120" (3048 mm) allow you to select the right size for your skid steer and your job! Optional pull-back kits give an operator the ability to draw materials back from confined areas such as loading docks or buildings.

Sod Unroller

The simple design of the Sod Roller requires no hydraulics, and provides an easy and economical method to quickly lay large rolls of sod. Slide the roller shaft through the center of the sod roll, drive up to the roll and lift up to begin unrolling the sod. Use this bi-directional attachment to quickly place sod in a forward or backward path. Strong tubular frame constructed of 3" x 3" x 1/4" steel handles rolls of sod with fiber or plastic core up to 48" (1219 mm) wide and 60" in diameter.

Sod Unroller		Model	Max. Opening (in/mm)	Max. Dia. (in/mm)	Wt. (lbs)	Retail Price
<i>Universal</i>						
50504223	Sod Unroller	SU48	48/1219	60/1524	275.0	\$1,041.00

Spreaders • Electric Spreader

The electronically powered 5.75 ft³ (.16 m³) spreader is designed to handle most dry, free flowing granular materials, including salt, seed and fertilizer (not to be used with sand). Ideal for sidewalks, grass or soil. This unit is engineered with minimal moving parts to reduce maintenance costs. There is an optional gate assembly to control the flow of light materials to the discharge assembly. It features a heavy duty 12 volt DC motor in a weather tight enclosure, and a low profile design for operator visibility.

Electric Spreader		Model	Cap. (ft ³ /m ³)	Cap. (lb/kg)	Power	Spreading Width (ft/m)	Wt. (lbs)	Retail Price
<i>Universal</i>								
50504388	Electric Spreader	SS575	5.75/.16	460/209	12-15 amps	4-40/1.2-12	106.0	\$2,338.00

503073	Material Deflector Kit (recommended for sidewalks)						2.0	\$193.80
501074	Gate Assembly for spreading salt (controls the flow of light materials to the discharge assembly)						6.0	\$321.30

Spreaders • Hydraulic Spreader

A Hydraulic Spreader features a self-loading 8 cubic foot capacity hopper with an agitator that prevents material from bridging for smooth flow. Remain in the cab and simply scoop up the sand, salt, seed, fertilizer or any free-flowing granular material and begin spreading a path from 29 inches for sidewalks up to 28 feet for larger areas like parking lots or roads. Material moves down through 3 adjustable gates at the bottom of the hopper and onto an 18" wheel that disperses the material. Steps are positioned on both sides of the unit for easy access in and out of the cab and an optional Sidewalk Deflector Kit spreads material precisely at a 29 in. or 37 in. width. Comes complete with hoses and flat face couplers.

Hydraulic Spreader		Model	Hyd. Req. (gpm/lpm)	Height (in/mm)	Overall Width (in/mm)	Depth (in/mm)	Cap. (ft ³ /m ³)	Spreading Width (ft/m)	Wt. (lbs)	Retail Price
<i>Universal</i>										
503774	Hydraulic Spreader	SS8H	10-22/38-83	41/1041	54/1382	32/813	8/.23	2.4-28/7.3-8.5	415.0	\$3,498.00
<i>Optional Equipment</i>										
503775	Sidewalk Deflector Kit (recommended for sidewalks)								12.0	\$219.00

Stump Grinders • Stump Grinder

A Stump Grinder will disintegrate tree stumps efficiently and effortlessly by using a toggle switch to swivel the stump grinder. Carbide steel teeth and easy-to-use controls help you to quickly grind stumps into wood chips. Standard and high flow models available to handle stumps up to 45" (1143 mm) in diameter, and up to 12" (305 mm) below ground. Comes complete with hoses and flat face couplers.

Stump Grinder		Model	Hyd. Req. (gpm/lpm)	Speed (rpm)	No. of Teeth	Digging Depth (in/mm)	Drum Dia. (in/mm)	Wt. (lbs)	Retail Price

Stump Grinders • Stump Grinder, Self-Feeding

A Stump Grinder has a unique hinged pivot self-feeding design for efficient grinding of stumps up to 30" wide and as deep as 10" below ground in minutes! It features a 24" cutting wheel with 36 teeth and is compact for transport and storage. Hydraulic controls are simple to operate - no need for a separate electric control box. Easy to hook up and remove from most skid steers. Comes complete with hoses and flat face couplers.

Stump Removal Bucket

A Stump Removal Bucket is ideal for quick and efficient removal of tree stumps and roots. Three 23-Series cast steel teeth dig deep under roots. With a tilt of the quick attach, side teeth on the bucket cut through stubborn roots. This versatile tool can also be used for digging ditches, moving trees and installing rock using it's funnel shape. The bucket measures 20" high, 62.5" long and features a 1/2" laser-cut-steel bucket with a 1" thick cutting edge for added durability.

Tilt Attach

Fully utilize your skid steer loader on hilly terrain or in any area you need to tilt an attachment. Tilts up to 18 degrees in either direction. Tilt buckets and landscaping attachments for more precise grading and leveling. Tilt trenchers for verticle cuts even on hills. An optional valve kit and control box is required for use with hydraulic powered attachments. Comes complete with hoses and flat face couplers.

Tires • Severe Duty

Severe duty tires offer over 1" of tread, with an enhanced rubber compound. These tires are ideally used in cold planing, demolition or other severe applications.

Severe Duty		Model	Width (in/mm)	Ply Rating	Tread Depth (in/mm)	Load Rating (lbs/kg)	Overall Dia. (in/mm)	Rim Dia. (in/mm)	Wt. (lbs)	Retail Price
540068	Severe Duty Tire 10 x 16.5	SEV10	10/254	10	1.375/35	4710/2136	30.6/777	16.5/419	87.0	\$346.00
* 540069	Severe Duty Tire 12 x 16.5	SEV12	12/305	14	1.375/35	6780/3075	32.7/830	16.5/419	103.0	\$394.00

 3. Order spacers AND turn wheels out set for clearance.
 4. Turn wheels around for clearance.
 5. Remove fenders.

Tracks, Grouser • Crossbar

Grouser Crossbar Tracks increase traction and flotation in soft, muddy conditions and reduce ground pressure by as much as 50%. Features include 1-1/4" hardened field-replaceable bushings and a link design with 50% deeper end wear areas for longer endurance and operation. Crossbars and traction bars are induction hardened for greater durability and performance. Tracks are available to fit tires from 8.5" (216 mm) to 14" (356 mm).

For 10.00 Tires		Wt. (lbs)	Retail Price
503070	Grouser crossbar tracks to fit 27x8.5 tires - 30 pads (15 per side), will accommodate 33" to 34.5" wheelbase	750.0	\$3,000.00
503175	Grouser cross bar tracks to fit 27x10.5 tires - 30 pads (15 per side) will accommodate 35" to 37" wheelbase	810.0	\$2,460.00
503742	Grouser low profile cross bar tracks to fit 10.00 tires - 32 pads (16 per side), will accommodate 36.3" to 37" wheelbase	810.0	\$2,625.00
502271	Grouser crossbar tracks to fit 10.00 tires - 32 pads (16 per side), will accommodate 33" to 36.3 wheelbase	810.0	\$2,625.00
* 502272	Grouser crossbar tracks to fit 10.00 tires - 34 pads (17 per side), will accommodate 37.9" to 42.5" wheelbase	861.0	\$2,790.00
502273	Grouser crossbar tracks to fit 10.00 tires - 36 pads (18 per side), will accommodate 42" to 45" wheelbase	861.0	\$2,950.00
Replacement Parts			
511189	Track Link, 3.75" Center to Center, E & F Series	1.0	\$6.38

Tracks, Grouser • Hard Pad Style

Grouser Hard Pad Style Tracks are the best performing tracks used in sandy soil. These tracks offer 5" wide pads for improved floatation, reducing ground pressure by as much as 50%, protect your tires and reduce tire wear in abrasive conditions. Features include 1-1/4" hardened field-replaceable bushings and easy installation. Contractor-grade, heavy duty components with two built-in traction bars improve track-to-tire grip and easily withstand continued operation on hard surfaces. Fits skid steers with tires 10" (254 mm) and 12" (305 mm) wide.

For 10.00 Tires		Wt. (lbs)	Retail Price
503677	Grouser hard pad tracks to fit 27-10.50-15, 10.00 tires - 34 pads (17 per side), will accommodate 33" to 34.5" wheelbase	748.0	\$2,580.00
503678	Grouser hard pad tracks to fit 10.00 tires - 36 pads (18 per side), will accommodate 35.5" to 39" wheelbase	792.0	\$2,740.00

Tracks, Grouser • Hard Pad Style

Grouser Hard Pad Style Tracks are the best performing tracks used in sandy soil. These tracks offer 5" wide pads for improved floatation, reducing ground pressure by as much as 50%, protect your tires and reduce tire wear in abrasive conditions. Features include 1-1/4" hardened field-replaceable bushings and easy installation. Contractor-grade, heavy duty components with two built-in traction bars improve track-to-tire grip and easily withstand continued operation on hard surfaces. Fits skid steers with tires 10" (254 mm) and 12" (305 mm) wide.

Tracks, Grouser • Soft Pad Style

Grouser Soft Pad Style Tracks have replaceable non-marking shoes designed to prevent marring on hard surfaces such as concrete or asphalt, and also perform well in adverse conditions such as mud or sand. The soft shoes on these tracks are bolt-on and replaceable and reduce ground pressure by as much as 50%. Design is easy on the tires and provides strength and tire protection. Available for most skid steers with tires 10" (254 mm) and 12" (305 mm) wide.

For 10.00 Tires		Wt. (lbs)	Retail Price
502293	Grouser soft pad tracks to fit 10.00 tires - 44 pads (22 per side), will accommodate 33" to 36" wheelbase	850.0	\$4,200.00
* 502294	Grouser soft pad tracks to fit 10.00 tires - 46 pads (23 per side), will accommodate 36.5" to 40" wheelbase	886.0	\$4,400.00
502295	Grouser soft pad tracks to fit 10.00 tires - 48 pads (24 per side), will accommodate 40.5" to 43" wheelbase	924.0	\$4,600.00
502296	Grouser soft pad tracks to fit 10.00 tires - 50 pads (25 per side), will accommodate 43" to 47" wheelbase	962.0	\$4,800.00
Replacement Parts

Tree Handlers • Tree Boom Lift

The Tree boom is ideal for moving trees for transplanting. Can also be used to load and unload attachments or lift and move construction materials from hard to reach areas. A simple and economical attachment to make your equipment more versatile.

Tree Boom Lift		Model	Length (in/mm)	Cap. (lb/kg)	Wt. (lbs)	Retail Price
Universal						
501664	Boom Lift/Tree Boom	TB77	59.25/1505	3500/1588	182.0	\$665.00

Tree Handlers • Tree Handler-Nursery Jaws

Upgrade from using forks and you'll never go back! Use the tree handler attachment to load and unload trees, transport and plant nursery stock, or move and place boulders. Forks up to 80" (2032 mm) will carry loads up to 5,000 lbs (2268 kg). Use it for balled and burlapped trees up to 60" (1524 mm), boxes up to 48" (1219 mm) and pots up to 65 gallon (246 L), depending on the model. Comes with hoses. Couplers sold separately.

Tree Handler-Nursery Jaws		Model	Ball Dia. (in/mm)	Tine Length (in/mm)	Max. Opening (in/mm)	Cap. (lb/kg)	Wt. (lbs)	Retail Price
Universal

Tree Puller/Grabbing Tool •

Tree Puller/Grabbing Tool is designed for tough landscaping, construction and agriculture applications. Use it's powerful jaws to easily pull posts, rebar, invasive trees and roots or shrubs out of the ground. This handy tool opens up to 11.5" (292 mm) and protects the hydraulic hoses away from the jaws. Lift capacities are based on the lift capacity of the machine NOT the attachment. Hoses and flat face couplers included. Optional hose saver kit recommended.

Tree Puller/Grabbing Tool		Model	Max. Opening (in/mm)	Jaw Length (in/mm)	Overall Length (in/mm)	Overall Width (in/mm)	Height (in/mm)	Wt. (lbs)	Retail Price

Tree Shears

Ideal for clearing fence lines and other hard-to-reach areas, a Tree Shear is necessary to many forestry and agricultural applications. Featuring adjustable, high-tensile steel blades, that will clip hardwoods up to 14" (356 mm) diameter in one snip. The tree shears feature blades made of AR400 steel, a low profile design for excellent visibility, and the full-length bushings in the jaws and cross-cut "grease galleys" in the hinge pins ensure a long, trouble-free life. The model with the accumulator arm allows the operator to shear one tree and hold it in place with the accumulator while shearing another tree, thus increasing productivity. Come complete with hoses and flat face couplers.

Tree Shears		Wt. (lbs)	Retail Price
<i>Universal</i>			
* 502130	14" (356 mm) EDGE Tree Shear	1460.0	\$10,500.00

511116	Flat Face Hydraulic Coupler, Female #8, 1/2 NPT	0.5	\$60.20

Tree Shears • High Reach Clipper

The 6-foot reach and rotating cutting head means you'll keep clear of brush and thorns when using these tree shears! Two models are available for easy removal of trees, branches and brush from hard to reach areas, overrun pastures, fields and fence rows. Both models feature 6' reach and a rotating cutting head with powerful jaws to make a smooth cut on hardwoods up to 9" (229 mm) in diameter, even at ground level. The Heavy-Duty and the Extreme-Duty model features a 110-degree rotating cutting head with a wireless remote control for easy transfer to another piece of equipment without the complication of a wire harness. Both models come complete with hoses and flat face couplers.

Tree Spades and Transplanters

• Tree Spades

Completely transplant trees and shrubbery with the tree spade. This economical attachment is used for a variety of applications. Available for ball sizes from 36" (914 mm) to 48" (1219 mm), the tree spade features 3/8" (9.5 mm) plate with tapered and sharpened edges. Move and place trees, shrubbery, and boulders and dig holes for new trees, all with the same attachment!

Tree Spades and Transplanters

• U-Blades

This essential landscape tool will transplant and remove trees and shrubs, and can be used to dig, trench and break up hard soil and rocks, all with the same attachment. This versatile attachment can also be used to cut sod. The blade is made of 3/8" high carbon steel and the open design allows forward and backward digging up to 48" (1219 mm).

Tree Spades and Transplanters

• Tree Transplanters

Perfect for landscapers and nursery owners EDGE Tree Transplanters allow you to take advantage of the power of your skid steer to plant, transplant and remove mature trees with up to 50" (1270 mm) diameter root balls. These heavy duty units come standard with semi-truncated 1/4" high alloy steel blades and an additional valve port for operating rear stabilizers. Rear stabilizers and counterweights are recommended on all skid steers and track loaders. Come complete with hoses and flat face couplers.

Trencher • XR-14 (10-20 gpm)

The industry standard. Operates with hydraulic flows between 10-20 gpm (38-76 lpm). The trencher is available in 24"-48" (609-1219 mm) digging depths and 6"-12" (152-305 mm) trench widths. Features manual or hydraulic side-shift to get up close to buildings. Single Standard chains recommended for loose, damp soil. Double Standard chains recommended for harder, drier soil, roughly twice the number of teeth. Half Rock & Frost chains recommended for harder, frozen and rocky digging conditions. Comes complete with trench cleaner arm, hoses and flat face couplers.

Trencher • Trencher Options

Trenchers are one of the most common attachments for a skid steer loader. Various chain types are available to suit the soil type and size of the project. Trenchers have a double-flighted spoil auger and excellent wear resistance on the drive sprocket. Increase the productivity of your skid steer loader with a trencher attachment!

Trencher Options		Wt. (lbs)	Retail Price

Vibratory Roller • Smooth Drum

The smooth drum roller is a tough compaction tool for compacting dirt, sand, gravel, asphalt or backfill. Widths of 73" (1854 mm) and 84" (2133 mm) and centrifugal force up to 9765 lbf (43.4 kN) means you can handle big jobs fast! NOT a high flow attachment. Comes complete with hoses and flat face couplers.

Augers • Chain Drive

The chain reduction drive units are designed for medium to heavy-duty applications, and are a very popular alternative to the planetary drive augers. Auger drives feature pre-stressed, fully adjustable reduction drives and the strongest connecting links available. Choose auger drive units and bits in 2-9/16" Round or 2" Hex output shafts. Complete units include the universal skid steer mount, top link, hoses, and flat-faced couplers. All bits sold separately.

Brooms • Angle

The angle broom cleans up just about anything, anywhere! This attachment can be used year-round and is an excellent tool to assist in removal of snow or debris on sidewalks, parking lots and more. All brooms feature 50/50 poly/wire combo brush material. Brooms are available in widths ranging from 48" (1219 mm) to 96" (2438 mm), and have a manual angle up to 30 degrees - hydraulic angle kits optional. All angle brooms also feature a fold-away stand to protect the bristles in storage. An optional Dust Control Kit helps to reduce dust and flying debris. Comes complete with hose saver kit, hoses and flat face couplers.

Brooms • Hopper

This bi-directional collection broom allows you to sweep in forward and reverse, and gives excellent performance in milling, material pickup, road maintenance and job-site cleanup. This is a cost-effective investment for contractors and rental houses. The hopper broom is a single-motor broom and comes in widths ranging from 60" (1524 mm) to 84" (2133 mm). The hopper broom is also available with a waterless dust abatement system in widths ranging from 60" (1524 mm) to 84" (2133 mm). Optional Dust Control Kit helps reduce dust and flying debris. Optional Gutter Brush attachment helps remove debris from curbsides and hard to reach areas. Comes complete with hoses, couplers, and bolt-on cutting edge.

Buckets, 4-in-1 Combination

This multi-tasking 4-in-1 Combination Bucket keeps your skid steer productive and profitable. Use one bucket for a wide variety of applications such as site cleanup, grading, scraping, grappling, dozing dirt, brush removal, material spreading and more. High strength steel clam shell bottom designed to prevent bowing with heavy material and two large, guarded cylinders provide powerful clamping. Sizes range from 60" (1524 mm) to 72" (1829 mm) with standard, heavy-duty and heavy-duty with teeth models to choose from. Heavy-duty buckets feature reinforcement plates and a holding valve to keep clam in locked position. All 4-in-1 Buckets come standard with 3/4"x6" weld-on cutting edges with holes, as well as bolt-on cutting edges for the front dozer edge and rear of the clam edge. An optional cutting edge or serrated edge is available for the front bucket. All units come complete with hoses and flat face couplers. May come in contact with 14x175.5 tires on vertical lift skid steers (i.e. Gehl V400 & Mustang 4000V). Some larger skid-steer loaders and most compact track loaders may require hose extensions for supply hoses; see options.

4-in-1 Combination Buckets		Model	Overall Width (in/mm)	Inside Width (in/mm)	Depth (in/mm)	Height (in/mm)	Heaped Cap. (ft ³ /m ³)	Wt. (lbs)	Retail Price

Buckets, Utility Fork

Utility Fork buckets are extremely efficient in moving loose items such as hay, manure, branches and limbs. Ideal uses include landscaping and agricultural applications. The design of the unit allows for good visibility of the load as well as allowing the fork to get close to fences or sides of stalls or buildings. Available in sizes from 54" (1372 mm) to 78" (1981 mm).

Utility Fork		Model	Overall Width (in/mm)	Height (in/mm)	Depth (in/mm)	Tine Spacing (in/mm)	Tine Dia./Width (in/mm)	Wt. (lbs)	Retail Price

Grapples • Grapple Buckets

Move heavy, hard-to-handle materials on the construction site or anywhere you need to! Grapple buckets are available in Standard, Medium and Heavy Duty models in widths from 60" (1524 mm) to 88" (2235 mm). They feature independently operating grapple arms for powerful clamping on uneven loads. Our grapple buckets feature enclosed cylinders and hoses to protect against debris and come complete with hoses and flat face couplers. Some larger skid steer loaders and most compact track loaders may require hose extensions for supply hoses.

512838	Fork Latch Assembly, Knob Style (includes pin, latch, knob)					0.5	\$15.30

Snow Blower

With the Snow Blower attachment, you can remove snow from sidewalks, driveways or any area your skid loader will fit. Widths range from 4-ft. (1.2 m) to 8-ft. (2.4 m), and they can throw snow up to 45-feet (13.7 m). The poly-lined, hydraulically controlled chute and deflector has a 280 degree radius, so you can easily put the snow where you want it! Snow blowers are available for standard or high-flow hydraulics. Optional truck chute kit available for high flow G & H models.

 AttachmentInfo@Manitou-Group.com

WARRANTY STATEMENT

Manitou Americas, Inc., warrants products purchased from Manitou Americas to the Original Retail Purchaser to be free from defects in material and workmanship for a period of twelve (12) months from the warranty start date.

Manitou Americas, Inc. warranty service includes parts and labor costs required to repair or replace products purchased from Manitou Americas at the selling dealer's business location. Manitou Americas makes no representations or warranties of any kind, expressed or implied (including the implied warranties of merchantability and fitness for particular purpose), except as expressly stated in this warranty statement.

Manitou Americas Warranty Service Does Not Include:

1. Transportation to selling dealer's business location or, at the option of the original retail purchaser, the cost of a service call.
2. Used equipment.
3. Components covered by their own non-Manitou Equipment Americas, LLC warranties, such as tires.
4. Normal maintenance service and expendable wear out items.
5. Repairs or adjustments caused by improper use; failure to follow recommended maintenance procedures; accidents or other casualty.
6. Liability for incidental or consequential damages of any type, including but not limited to lost profits of expenses of acquiring replacement equipment.

No agent, employee or representative of Manitou Americas has authority to bind Manitou Americas to any warranty except as specifically set forth herein. Any of these limitations excluded by local law shall be deemed deleted from this warranty; all other terms will continue to apply.

For warranty service contact:

Manitou Americas, Inc.

Direct: 262.387.1210
